

Seaford S.T.E.M. Fair Research Project

Power Point Criteria

Your PowerPoint should have all of these components.

- State the **Problem** or explain your project if you are doing a **Research Project**.
- State the **Hypothesis**, this is an educated guess, so include your background resources, web sites etc...
- State the **Materials** used.
- State the **Independent** and **Dependent** variables and **Controls** in your experiment.
- State and describe the specific steps required in your **Procedure**, be as descriptive as possible, so someone else could recreate the experiment and should get the same results.
- **Summarize your data**. This could be in graphs, charts and or data tables.
- **Conclusion**; Explain the outcome of your experiment. Explain how your data (**quantitative** and or **qualitative** data) led to the acceptance or rejection of your hypothesis.
- **Apply your research** to the world and/or suggest further research in the area.

Duggy's science project gets in Mr. Og's hair.
